- Promoting best practice
GDPR Myth-Buster

- GDPR does not mean you need consent for everything...
  
  Yes there are now more exacting rules about obtaining valid consent, but Managing Trustees need to bear in mind that they do not need consent for everything.

  “Consent is one way to comply with the GDPR, but it’s not the only way.” (Elizabeth Denham, 16 August 2017. ICO blog “Consent is not the Silver bullet for GDPR compliance”)

- GDPR will not automatically lead to small charities paying huge fines...
  
  Yes GDPR gives the ICO much greater powers to impose eye watering fines, but the ICO stresses that it is a proportionate regulator and as explained by:

  “…it’s scaremongering to suggest that we’ll [the ICO] be making early examples of organisations for minor infringements or that maximum fines will become the norm.” Elizabeth Denham, 9 August 2017. ICO blog “GDPR – sorting the fact from the fiction”

- GDPR is not Y2k...
  
  Managing Trustees may remember the hype surrounding Y2k? Rest assured that GDPR is not a cliff edge.

  “GDPR compliance is an ongoing journey”. Elizabeth Denham, 22 December 2017. ICO blog “GDPR is not Y2K”

Data Protection Officer

- Statutory Role

- Articles 37, 38 and 39 of GDPR

- **Not** required by Managing Trustees

- Alternatives to this role may be:
  - Data Protection Administrator
  - Privacy Co-ordinator
  - Data Compliance Manager
Question 1

Q. The 9 Steps guidance suggests that manual files should be held in locked filing cabinets. Many people work at home and do not have lockable filing cabinets.

A. We have to take a common sense approach, we know that office holders do not always have the luxury of having a church office. However, we need to ensure that personal data is safe when kept in people’s homes. The church should have procedures in place to deal with files which are kept at residential addresses e.g what happens when a new person takes over that role.
Question 2

Q. Which Officers (District, Circuit & Local Church) can hold what data?
A. There is no definitive answer, again a common sense approach needs to be taken. Look to the Data Protection Principles to ensure that the data is adequate, accurate, limited to the purpose for which it is collected. Data Protection is about protecting people, therefore only the people who actually need the data should hold it.

Question 3

Q. Who does the Legitimate Interest Basis apply to?
A. Difficult question to answer because it applies to anybody where the processing of the data is necessary. There must also be an expectation from the individual that their data will be used in such way. E.g. a tenant of church property must expect that church officers will hold their essential contact details.
